

CLEAN TRUCK CHECK MADE SIMPLE [2026]

RV EDITION

For California Motorhome Owners

How to pass your Clean Truck Check or remove your DMV stop without leaving your driveway.

DOES THIS APPLY TO ME?

Yes, if your motorhome meets these three criteria:

1. **Fuel:** Diesel-powered.
2. **Size:** GVWR over 14,000 lbs (Class A "Pushers" & Super Cs).
3. **Registration:** Registered in California.

When is my test due? Your deadline = Your DMV Registration Renewal Date.

- *Example:* If your tags expire in July, you must pass your test between April and July (the 90-day window).

THE 3-STEP TESTING GUIDE

1

PAY THE FEE

What: Annual Compliance Fee (\$32.13 for 2026).

Where: Pay online at the CARB "CTC-VIS" portal.

When: Due annually by your compliance deadline.

2

TAKE THE TEST

Frequency: CA-registered motorhomes require ONE test / year.

The Window: Test within 90 days before your registration expires.

Don't Test Too Early: Testing 91+ days out doesn't count.

3

RENEW DMV TAGS

Once you pass, our system automatically uploads your certificate to CARB.

The "DMV Hold" on your registration is released, allowing you to get your stickers (usually within 24-48 hrs).

Schedule your test with [DES Sacramento](#) or [Redding](#) (we've got **Certified CTC testers** standing by) Or "roll the dice" & search the CARB Tester Database [Here](#)

THE LOCAL ADVANTAGE (REDDING & SACRAMENTO)

You can drive to our shop or **we come to you**.

We specialize in **Mobile RV Testing** for the North State. We visit:

- Private Driveways
- RV Storage Facilities
- RV Parks & Campsites

SERVICE AREAS:

- **Redding / Shasta County:** (plus Anderson, Cottonwood, Red Bluff, & surrounding counties.)
- **Sacramento Area / Valley:** (Including Roseville, Elk Grove, Folsom, and more.)

⚠ The RED FLAGS (Read Before Testing) ⚠

DO NOT Clear Your Codes: If you have a Check Engine Light, do not use a scanner to "clear" it right before we arrive.

- Why? This resets your vehicle's internal monitors.
- Result: You will fail the test immediately for "OBD Not Ready" and have to drive miles to reset it.
- Fix: If the light is on, call us for a repair strategy first.

The "Warm Up" Rule: Your engine must be at operating temperature for the test. Please drive the RV for 15–20 minutes before our technician arrives at your home or storage lot.

Get Your RV Tested Today!

Don't let a DMV hold delay your next trip. Shop & Mobile Testing options available.
